## TRANSPORTATION

VITAL SIGNS  
CITIZEN SURVEY SAYS:

**C+**

### LET'S CELEBRATE

- Cycling opportunities and expanding cycling infrastructure
- Good public transit service
- High level of walkability

### ROOM FOR IMPROVEMENT

- Investment in light rail/rapid transit
- Regional coordination of new transportation infrastructure
- Service and affordability of buses

Left: Sarah Webb and Lindsay Taylor of the Active & Safe Routes to School project – a national movement dedicated to children's mobility, health and happiness

### REGIONAL DATA

#### VEHICLE USE & COMMUTING

METHODS OF COMMUTING TO WORK OR SCHOOL, 2015/16

**63%**

Percentage of Greater Victoria residents who reported that vehicle was their main mode of non-work/school transportation in 2015/16.

### DID YOU KNOW?

Besides the obvious bicycle lanes on roadways, there are many features and services that are helping to make the Capital Region more cycle-friendly. For example, there are currently more than 1,000 sidewalk bicycle parking opportunities in downtown Victoria, plus more than 100 spots within 5 city-owned parkades. And cyclists who use BC Transit to commute from outside the core can use bike lockers available at the McLeish Road Park and Ride near the Airport, at the Western Exchange Park and Ride in Colwood, or at the Langford Exchange on Station Avenue.

### 2015/16 TRANSIT USE

**51%** OF TRANSIT RIDERS IN GREATER VICTORIA REPORTED RIDING TRANSIT BY CHOICE, UP FROM 46% IN 2014/15.

IN 2015/16, THE VICTORIA REGIONAL TRANSIT SYSTEM PROVIDED **809,000** SERVICE HOURS AND **25.8** MILLION PASSENGER TRIPS THROUGH ITS CONVENTIONAL TRANSIT SERVICE.

Greater Victoria's transit system continues to out-perform similar-sized transit systems across Canada with **38.3%** more passengers per capita, **12.4%** more passengers per service hour and **13.5%** lower operating cost per passenger.

### DID YOU KNOW?

Victoria Regional Transit Commission

No matter where you are in Victoria, the familiar glimmer of BC Transit buses is always within view – and we wouldn't have it any other way! BC Transit's mission is to connect people and communities as they continue to work with customers and federal, provincial, and local partners to build a sustainable future.

Last year alone, well over 25 million trips were taken on BC Transit conventional

buses in Victoria, while over 350,000 were taken with BC Transit handyDART. This means that Victorians, more than ever before, are choosing sustainable transportation options to explore the beautiful city we call home.

While proud of the past, our transit future is what's truly exciting. Through the Public Transit Infrastructure Fund (PTIF), the federal and provincial governments have secured \$26 million for transit

improvement projects in Victoria.

Over the next three years, the PTIF investment will fund the extension of bus lanes on Highway 1 from Tolmie Avenue to the McKenzie interchange, an upgraded handyDART maintenance and operations facility, and the installation of CCTV cameras and automated vehicle location technology on conventional vehicles in Victoria. This is designed

to make the transit journey safer for operators and customers, as well to improve customer service.

BC Transit is proud to be part of this community, and honoured to be trusted to take Victorians to where they need to be. Whether it is a punctual morning commute to school or work, or a leisurely weekend trip to the ferry terminal or the beach, BC Transit connects you to your community.

### THE ISSUE

Support for alternative transportation options.

# Community Indicators

## Library-related Community Indicators

### Arts and Culture: Indicator Definitions and Rankings

#### Public Library

#### Number of Persons with Library Cards per 1,000 Residents

Measures the total number of persons having a library card in an area.

Definition: The number of persons per 1,000 residents that possess a valid public library system card. This includes all library card types (first card, juvenile, young adult, adult).

(SOURCE: ENOCH PRATT FREE LIBRARY, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

#### Five Highest:

1. Cherry Hill
2. Oldtown/Middle East
3. The Waverlies
4. Patterson Park North & East
5. Harbor East/Little Italy

#### Five Lowest:

1. Morrell Park/Violetville
2. Cross-Country/Cheswolde
3. Dickeyville/Franklintown
4. Southeastern
5. Howard Park/West Arlington

# Indicators and Equity

*It's easy to lie with statistics;  
but it's hard to tell the truth without them.*

- Andrejs Dunkels

# The truth vs. the whole truth

Grade 12 Student Performance by SES Group  
Language Arts Standards Test 2001/02

# What data disaggregation tells us

A ROBUST AND INNOVATIVE ECONOMY, STUNNING NATURAL BEAUTY, A THRIVING CULTURAL AND ARTS SCENE, AND AN OPENNESS TO DIVERSITY MAKE KING COUNTY A VIBRANT HOME TO OVER 2 MILLION RESIDENTS.

BUT WHEN YOU LOOK CLOSER, SIGNIFICANT PORTIONS OF OUR COMMUNITY ARE BEING LEFT BEHIND. (1 of 2)

## EDUCATION ON-TIME HIGH SCHOOL GRADUATION RATES

### BY RACE

### BY PLACE

## INCOME ANNUAL HOUSEHOLD INCOME

### BY RACE

### BY PLACE

THESE DIFFERENCES ARE PREVENTING MANY OF OUR RESIDENTS FROM REACHING THEIR FULL POTENTIAL.

# What data disaggregation tells us

## RACE AND PLACE MATTER IN KING COUNTY.

RACE AND PLACE PREDICT WHETHER PEOPLE HAVE THE OPPORTUNITY TO THRIVE.

### QUALITY OF LIFE INDICATORS

### COMMUNITIES OF COLOR

PEOPLE OF COLOR GENERALLY DO NOT EXPERIENCE THE SAME QUALITY OF LIFE AS WHITE RESIDENTS.

# What data disaggregation tells us

## CHILD POVERTY

City-wide roughly 20% of Boston's children live in families in poverty, but the rate jumps as high as 40% or more in neighborhoods of Roxbury, Dorchester, Mattapan, and in small islands throughout all of the city's neighborhoods—the result of where we decided to build subsidized affordable housing.

## EDUCATIONAL ATTAINMENT

Though we pride ourselves on having one of the most educated populations in the world, we see the two-tied knowledge economy taking shape – in the light gray areas fewer than 20% of adults have a bachelor's degree or higher.

# Measures that Matter

*[T]he gross national product includes air pollution and advertising for cigarettes, and ambulances to clear our highways of carnage. It counts special locks for our doors, and jails for the people who break them.*

*The gross national product includes the destruction of the redwoods and the death of Lake Superior. It grows with the production of napalm and missiles with nuclear warheads....*

*And if the gross national product includes all this, there is much that it does not comprehend. It does not allow for the health of our families, the quality of their education, or the joy of their play. It is indifferent to the decency of our factories and the safety of streets alike. It does not include the beauty of our poetry or the strength of our marriages, the intelligence of our public debate or the integrity of our public officials....*

*The gross national product measures neither our wit nor our courage, neither our wisdom nor our learning, neither our compassion nor our devotion to country. It measures everything, in short, except that which makes life worthwhile; and it can tell us everything about America -- except whether we are proud to be Americans.*

*-- Robert F. Kennedy*

*I have been using the library for the past seven months from the time I came to Brampton. It has been a heaven, a home away from home, and also a companion! This place has opened my eyes to so many things, especially elearning and also to keep up to what's happening around the world today.*

# LEARNER GUIDE

## Measures that Matter Part Three: Moving Toward More Meaningful Measures

<http://www.webijunction.org/events/webijunction/measures-that-matter-3.html>

**Event Description:** Circulation, visits, program attendance, and many other measures commonly collected by public librarians. But which measures tell the most meaningful stories of today's libraries? In this series, we discussed the current state of the public library data landscape – what data collection efforts exist at the national level and how they impact what we know about libraries and their patrons. In this third webinar, we will look toward the future, considering what data public librarians should collect to demonstrate their impact. To do this, we will hear from speakers both within and outside of the library field who will provide multiple perspectives on meaningful measures.

This webinar is the third in a three-part series about the Institute of Museum and Library Services' Chief Officers of State Library Agencies' Measures that Matter initiative, a field-wide discussion of the current state of public library data.

**Presented by:** Chantal Stevens, Rebecca Joppa and Linda Hofschire

What are your goals for viewing this webinar?	
Personal Goals	
Team Goals	
Community Indicators	
Two examples of Community Indicators projects that were mentioned during the webinar are <a href="#">ACT Rochester</a> and <a href="#">SA2020</a> . Check out the various indicators for these projects – for example, children and youth, education, financial self-sufficiency, and arts and culture. Do these give you any new ideas for measures you could track in your library? If so, list them below.	

Indicator Projects
Check to see if there are any indicator projects in your area by searching the Community Indicators Consortium <a href="#">projects database</a> (enter state or county in search box). If you find a project in your area, consider/discuss how your library contributes to the various indicators.

Focus on User Outcomes
During the webinar, some examples were provided for shifting language to focus on user outcomes (for example, using the phrase "advise and interact" instead of "provide services"). List three terms used in your library and how you could rephrase them to focus on user outcomes.

## Measures that Matter Part Three: Moving Toward More Meaningful Measures

<http://www.webijunction.org/events/webijunction/measures-that-matter-3.html>

**Event Description:** Circulation, visits, program attendance, patron satisfaction...these are some of the many measures commonly collected by public librarians. But how well do we understand what measures tell the most meaningful stories of today's libraries? During the first two webinars in this series, we discussed the current state of the public library data landscape – what data collection efforts exist at the national level and how they impact what we know about libraries and their patrons. In this third webinar, we will look toward the future, considering what data public librarians should collect to demonstrate their impact. To do this, we will hear from speakers both within and outside of the library field who will provide multiple perspectives on meaningful measures.

This webinar is the third in a three-part series about the Institute of Museum and Library Services' Chief Officers of State Library Agencies' Measures that Matter initiative, a field-wide discussion of the current state of public library data.
