Researching students' information choices: Determining the identity and judging credibility in digital spaces (RSIC)

<https://guides.uflib.ufl.edu/RSIC>

“Google Generation are **format agnostic** and have little interest in the containers (reports, book chapters, encyclopedia entries) that provide context and wrapping for information ‘nuggets’.”

(Williams & Rowlands, 2007)

Research questions

- How do STEM students, ranging from 4th grade to graduate school, determine the credibility of online information resources?
 - What cues from a web search results screen do students use to judge the credibility of online information resources?
 - How do students' characteristics influence their credibility judgments of online information resources?
- Do STEM students from 4th grade to graduate school differentiate among different types of online information resources during point-of-selection?
 - What cues from web search results screens do the students use to identify online information resources?
 - How do students' characteristics and experiences influence their identification behaviour?

Research methods

Data Collection

- Pre-screen survey
- Simulation
 - Pre-interview
 - Information choice tasks
 - Post interview

Participants

- 4th – 5th grade
- 6th – 7th grade
- 9th – 12th grade
- Community college
- University undergraduate
- University graduate

(Cataldo et al., 2020)

The simulation

Four of the simulation tasks

HELPFUL?

Finding #1

Do students care about the container of the information resources they use?

Importance of knowing the container

(Valenza et al., 2019)

Not *format agnostic*, but they are *format confused*

RSIC study: Percentage of containers identified correctly by student count (N=175)

(Cyr et al., 2021)

Observations of Container Collapse

Students creating the wrong citations because they identified the container wrong

Students losing points on an assignment where references had to be journal articles but they misidentified other resources as journal articles

TRAVELER

The Finest Museums in The World vs. Nature

By **Deborah Charnes** on January 11, 2020 at 5:00 PM

Chicago's Museums – Masterpiece Playgrounds

Born and raised in Chicago, I felt I was a lucky child. Some of the greatest museums were on school field trip agendas. Plus, I fondly recall many outings downtown with my mom. We'd take the elevated train, and **The Art Institute** was just a few blocks away.

<https://blog.chron.com/traveler/2020/01/the-finest-museums-in-the-world-vs-nature/>

Predicted change in percentage of containers correctly identified

Aboutness and IL thresholds

- Aboutness is a negative predictor of correctly identifying a container
 - Discerning aboutness is the one of the hardest information literacy (IL) thresholds to pass.
 - Related to these ACRL Framework dispositions:
 - ‘resist the tendency to equate format with the underlying creation process’
 - ‘realize that information sources vary greatly in content and format and have varying relevance and value...’

Journal article fixation

Created by Eucalyp
From the Noun Project

- Fixation on finding only the journal article container
 - Commonly see students asking to find ‘only journal articles’
 - Container is sometimes substituted for credibility analysis

Which of these findings is most surprising to you?

Start the presentation to see live content. For screen share software, share the entire screen. Get help at pollev.com/app

Finding #3

What container label did students use for an information resource in JStor?

Container labels applied to an article in the magazine *Science News* in JStor

	Blog	Book	Conference Proceeding	Journal	Magazine	News	Preprint	Website
High School (n=26)	0	2	0	7	4	9	0	4
Community College (n=30)	1	4	0	10	5	8	0	2
Undergraduate (n=30)	0	2	0	16	3	4	1	4
Graduate (n=30)	1	0	0	14	3	10	0	2
Total (n=116)	2	8	0	47	15	31	1	12

(Valenza et al., 2019)

Container labels applied to an article in the magazine *Science News* in JStor

	Blog	Book	Conference Proceeding	Journal	Magazine	News	Preprint	Website
High School (n=26)	0	2	0	7	4	9	0	4

Graduate (n=30)	1	0	0	14	3	10	0	2
Total (n=116)	2	8	0	47	15	31	1	12

(Valenza et al., 2019)

JSTOR in the humanities

- JSTOR is commonly used in high schools; undergraduates are familiar with this resource
- Undergraduates consider it gold-standard credible in the humanities, no matter what the container is
- Undergraduates seem to assume content in JSTOR is in a journal container, even graduate students

Branding and source recognition

- JSTOR = journal
- Springer = journal
- Wiley = textbook
- Gale = K12

Finding #4

How does container affect helpfulness, citability, and credibility judgments?

High school to graduate school helpfulness and citability judgments

(findings from
Buhler et al.,
2019)

High school to graduate school credibility judgments

(findings from
Buhler et al.,
2019)

(data from Buhler et al., 2019)

High school to graduate school opinions of the same information in different containers and genres

(findings from
Buhler et al.,
2019)

High School to Graduate School Helpfulness Judgments

(findings from
Buhler et al.,
2019)

High school to graduate school helpfulness and citability judgments

N=116

(findings from
Buhler et al.,
2019)

High school to graduate school credibility judgments

(findings from Buhler et al., 2019)

High school to graduate school opinions of the same information in different containers and genres

(findings from
Buhler et al.,
2019)

Container = credibility?

- Faculty desire for credibility in sources
 - Expressed as 'help students find credible sources'
 - Sometimes is focused on container as credibility
 - Incorporated into instruction in library resources
 - Quickly breaks down on the 'open' web

Created by Alex Bickov
From the Noun Project

Public dissemination of research

Created by Ragal Kartidev
From the Noun Project

- Confusion around popular news synopsized from research
 - Complicated container confusion
 - Which to use and cite?

Other than scholarly journals, what is the most common container you send your users to for credible information?

Start the presentation to see live content. For screen share software, share the entire screen. Get help at pollev.com/app
