- Nearly half of all Veterans own a firearm, and most Veteran firearm owners are dedicated to firearm safety.
- Firearm injuries in the home can be prevented by making sure firearms are **unloaded**, **locked**, and **secured** when not in use, with ammunition stored in a separate location.
- There are several effective ways to safely secure firearms. Learn more and find the option that works best for you and your family from the National Shooting Sports Foundation at [www.nssf.org/safety](http://www.nssf.org/safety).
